Ty Niskanen

niskanenty24@gmail.com | 603.723.6130 | github.com/tniskanen

Data Science student with practical experience using Python and R for academic and personal data projects. Looking to apply strong analytical and organizational skills in an entry-level data-focused position.

SKILLS

- **Languages:** Python (Pandas, NumPy, Matplotlib, scikit-learn), R (dplyr, tidyr, ggplot2), SQL (RDS, MYSQL Workbench), Java (Basic)
- **Tools:** VSCode, RStudio, Jupyter Notebook, Excel, MS Access, AWS (lambda, RDS, S3, EC2), Alteryx, Tableau

PROFESSIONAL EXPERIENCE

UPS ***Austin, TX***

Supervisor *Apr 2023- Apr 2024*

- Supervised a team of 40-50 employees handling all small packages (16 x 16 x 7) shipping through Austin, TX
- Responsible for training team members on hardware systems, coordinating warehouse workforce operations, assisting with employee-related HR tasks, and maintaining a safe, organized, and operational workspace.
- During my time with the company, our work area had the highest percentage of smalls containerized (processed) in the entire nation.

LEADERSHIP EXPERIENCE

Helena Bighorns Ice Hockey | NA3HL ***Helena, MT***

Team Captain *2019-2020*

- Led a team of 25+ athletes over the course of 8 months
- Liaised with coaching staff and teammates to communicate plans, set goals, and address challenges throughout the season.
- Recognized the importance of positive leadership in fostering a cohesive and successful team environment.

EDUCATION

Arizona State University — *B.S. in Data Science* ***Tempe, AZ / Remote***

Expected Graduation: Spring 2026 | CGPA: 3.36

- Honors & Awards: New American University Scholar- Dean's Award (**10,000$)**
- Relevant Coursework: Exploring Data in R & Python, Object-Oriented Programing, Stat Model Inference, Applied Linear Algebra, Applied Statistics, Industry Tools Data Science, Calculus III, Principles of Programming, Machine Learning, Design/Analysis of Experiments, Deep Learning ML Structures, Regression an Time Series Analysis

Helena High School ***Helena, MT***

Graduated 2018, GPA: 3.24

EDUCATIONAL/PERSONAL PROJECTS (Repositories available on GitHub)

Data Pipeline

- Created a data pipeline using AWS that pulls data from RIOT's API and store it in RDS using a data model built in python
- Currently testing data models/structures for various machine learning algorithms

HealthCare Access Index

- Pulled data from 7 different sources and created index scores, rating individual states access to healthcare

Electricity Demand Prediction Model

- Created various Regression based Machine Learning models to Predict Electricity Demands in New South Wales, Australia
